

Introduces AAPHD Series Mixer Amplifiers

Atlas Sound, the leader in commercial audio solutions for over 80 years, is proud to announce the release of the new AAPHD Series mixer amplifiers. The AAPHD Series is the culmination of years of development to deliver a multi use mixer amplifier that incorporates features designed to save integrators time and money.

The AAPHD Series features five models ranging from 30 watts to 400 watts that are designed for use in 70.7V speaker systems. The AAPHD features a unique, patent-pending automatic system test using the front panel "Push Here Diagnostic" button. This internal circuitry is designed to check the connected speaker lines for wiring and impedance errors. This test can be activated once all speakers are connected and the circuit automatically verifies that the attached speakers' tap settings do not exceed the amplifier's rated power

verifies that the attached speakers' tap settings do not exceed the amplifier's rated power, no speakers are mistakenly tapped at 8Ω, and the speaker wire is free from shorts. This allows for quick troubleshooting on site and after the sale. Additionally, models (except AA30PHD) incorporate a Remote Input Selection feature that allows the user to select an input and control the volume level from an optional remote wall plate, model WPD-RISRL, that can be placed up to 200-feet away from the amplifier. Each unit also includes an ultra low noise floor, allowing them to deliver exceptional sound quality.

"Mixer amplifiers are the most common amplifiers used by 70.7V integrators today", said Senior Vice President of Sales John Ivey. "This new series gives integrators something that no other model offers, an automatic test of the speaker lines. Not only is this a huge benefit to the installer onsite, who now has a quick way to test the system before moving on to the next item, but it also eliminates after install service calls. The owner can activate the PHD test and if no fault is indicated, the problem is in another part of the system. This eliminates troubleshooting time and effort; this is a feature that every integrator is going to love."

Models Available Include:

- AA400PHD 6-Inputs 400 Watts
- AA200PHD 6-Inputs 200 Watts
- AA100PHD 4-Inputs 100 Watts
- AA50PHD 4-Inputs 50 Watts
- AA30PHD 3-Inputs 30 Watts

See all of the new products from Atlas Sound and the Mitek Communications Group at the InfoComm Expo in Las Vegas, NV June 18th-20th, 2014 in booth #C10508.

About Atlas Sound

Since 1934, Atlas Sound has enjoyed a reputation as a leader in the manufacture of communications products for the commercial, broadcast, industrial, institutional, security, custom installation (home), and professional music markets.

The company's product groupings include: sound reinforcement systems; emergency communications systems; intercom/telecom products; residential infrared electronics; sound masking systems; power management equipment; electronic equipment cabinetry; indoor/outdoor loudspeaker systems; microphone stands, speaker stands, and accessories.

Atlas Sound, 4545 East Baseline Road, Phoenix, AZ, 85042. Phone: 800-876-3333, www.atlassound.com.
