## Introduces Flyable Line Array Speakers

Atlas Sound, the leader in commercial audio solutions for over 80 years, is proud to announce the release of its Atlas A-Line Acoustics AL123A-B and AL218A-B network configurable, flyable line array speaker and subwoofer. These new speakers are designed to provide high intelligibility and high output sound for large format installations including arenas, theaters, houses of worship, and auditoriums.

The AL123A-B is a three-way line array speaker that features an integrated amplifier with DSP network control. The unit includes dual 12" woofers, four 6" mid-range drivers, and dual 1.4" high frequency compression drivers. The AL123A-B features an integrated amplifier that delivers 2000-watts to the woofers, 800-watts to the mid-range drivers, and 400-watts to the high frequency drivers. The amplifier also includes on-board DSP software that allows the unit to be configured using the network to maximize the sound quality in the space.

The AL218A-B is a dual 18" subwoofer enclosure that includes an integrated amplifier capable of producing 3000-watts RMS power. Both the EL123A-B and AL218A-B include the patent pending EZAL rigging system that enables them to be flown or stacked easily and securely. The units include a universal power supply that auto selects between 85V and 268V, 50Hz-60Hz.

"The AL123A-B and AL218A-B are products that we have not had in our product mix in the past and that we have missed out on opportunities for not having them", said Senior Vice President of Sales John Ivey. "These speakers give our integrators another option to bid on projects and use Atlas Sound when they couldn't have before. Our engineering team has spent a lot of time making sure these speakers sound fantastic and are easy to use. We are going to have a short stack flown in our booth and we can't wait to have integrators, consultants, and designers experience the quality for themselves."

See all of the new products from Atlas Sound and the Mitek Communications Group at the InfoComm Expo in Las Vegas, NV June 18th-20th, 2014 in booth #C10508.

### About Atlas Sound

Since 1934, Atlas Sound has enjoyed a reputation as a leader in the manufacture of communications products for the commercial, broadcast, industrial, institutional, security, custom installation (home), and professional music markets.

The company's product groupings include: sound reinforcement systems; emergency communications
